

# **Trubolt®**

Wedge Anchors

#### **DESCRIPTION / SUGGESTED SPECIFICATIONS**

# Dependable Heavy-Duty, Inspectable Wedge Type Expansion Anchor

# Wedge Type Anchors — SPECIFIED FOR ANCHORAGE INTO CONCRETE

Trubolt Wedge anchors feature a stainless steel expansion clip, threaded stud body, nut and washer. Anchor bodies are made of plated carbon steel, hot-dipped galvanized carbon steel, type 304 stainless steel or type 316 stainless steel as identified in the drawings or other notations.

Trubolt+ Wedge anchors consist of a high-strength threaded stud body, expansion clip, nut and washer. Anchor bodies are made of plated carbon steel. The expansion clip consists

of a split cylindrical ring with undercutting grooves.

The exposed end of the anchor is stamped to identify anchor length. Stampings should be preserved during installation for any subsequent embedment verification.

Use carbide tipped hammer drill bits made in accordance with ANSI B212.15-1994 to install anchors.

Anchors are tested to ACI 355.2 and ICC-ES AC193. Anchors are listed by the following agencies as required by the local building code: ICC-ES, UL, FM, City of Los Angeles, California State Fire Marshal and Caltrans.

See Appendix B for Trubolt on performance values in accordance to 2006 IBC.

See Appendix C for Trubolt+ on performance values in accordance to 2006 IBCand 2009 IBC.

- 2006 and 2009 International Building Code (IBC) Compliant
- Versatile fully threaded design is standard on sizes up to 3/4" diameter and 10" length
- Anchor diameter equals hole diameter
- Standard carbon and stainless steel anchors 360° contact with concrete assures full expansion for reliable working loads
- Non bottom-bearing, may be used in hole depth exceeding anchor length
- Can be installed through the work fixture, eliminating hole spotting
- Inspectable torque values, indicating proper installation

# Fully Threaded Advantage

Trubolt's fully threaded feature eliminates subsurface obstruction problems.

# PERFORMANCE TABLE

Trubolt Wedge Anchors			Ultimate Tension and Shear Values (Lbs/kN) in Concrete*							
ANCHOR	DIA TORQUE	EMBEDMENT DEPTH In. (mm)	ANCHOR TYPE	f'c = 2000 PSI (13.8 MPa)		f'c = 4000 PSI (27.6 MPa)		f'c = 6000 PSI (41.4 MPa)

<sup>\*</sup> Allowable values are based upon a 4 to 1 safety factor. Divide by 4 for allowable load values.

#### **INSTALLATION STEPS**

1. Select a carbide drill bit with a diameter equal to the anchor diameter. Drill hole to any depth exceeding the desired embedment. See chart for minimum recommended embedment.

2. Clean hole or continue drilling additional depth to accommodate drill fines.

**APPLICATIONS** 

Anchoring machinery and conveyors is a common wedge anchor application. The Trubolt is fully threaded to allow a large range of embedment and fixture thickness.

Safety railings are commonly anchored with Trubolt wedge anchors because of availability in four material types for all corrosive atmospheres.

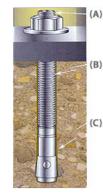

Seismic Wedge Anchor cracked concrete approval controls tension & shear simultaneously.

3. Assemble washer and nut, leaving nut flush with end of anchor to protect threads. Drive anchor through material to be fastened until washer is flush to surface of material.

- (A) Length ID Head Stamp-provides for embedment inspection after installation
- (B) Fully Threaded Design

Cold-Formed—manufacturing process adds strength

(C) Stainless steel split expansion ring

Anchor Body—available in zinc-plated steel, hotdipped galvanized steel, 304 stainless steel and 316 stainless steel

4. Expand anchor by tightening nut 3-5 turns past the hand tight position, or to the specified torque requirement.

## APPROVALS / LISTINGS

# $\mathsf{Trubolt}^{\mathtt{e}}$ Wedge Anchors

ICC Evaluation Service, Inc. - #ESR-2251

- Category 1 performance rating
- 2006 IBC compliant
- Meets ACI 318 ductility requirements
- Tested in accordance with ACI 355.2 and ICC-ES AC193
- Listed for use in seismic zones A & B
- 1/4", 3/8" & 1/2" diameter anchors listed in ESR-2251

## Underwriters Laboratories

Factory Mutual

City of Los Angeles - #RR2748

California State Fire Marshal

#### Caltrans

Meets or exceeds U.S. Government G.S.A. Specification A-A-1923A Type 4 (Formerly GSA: FF-S-325 Group II, Type 4, Class 1)

ICC Evaluation Service, Inc. - #ESR-2427

- Category 1 performance rating
- 2006 IBC and 2009 IBC compliant
- Meets ACI ductility requirements
- Tested in accordance with ACI 355.2 and ICC-ES AC193
- Listed for use in seismic zones A, B, C, D, E, & F
- 3/8", 1/2", 5/8" & 3/4" diameter anchors listed in ESR-2427

City of Los Angeles - #RR25867
